Education

Chandigarh University

Bachelor of Engineering in Computer Science – CGPA: 8.20

July 2021 – July 2025

Mohali, Punjab

Abhigyan International School

Class 12th – Percentage: 87.8

July 2019 – April 2020

Sanawad, Madhya Pradesh

Abhigyan International School

Class 10th – Percentage: 89.4

July 2017 – April 2018

Sanawad, Madhya Pradesh

Technical Skills

Programming Languages: Dart, Java, SQL

Developer Tools: VS Code, Google Cloud Platform, Android Studio, Firebase, Power BI

Technologies/Frameworks: GitHub, Flutter, Laravel Framework, Real-time data processing

App Architecture/Design Patterns: MVVM(Model–View–ViewModel), MVC (Model–View–Controller)

Languages: Hindi, English

Projects

ChitChat – Real-Time Chatting Application | *Flutter, Dart, Firebase, MVC Architecture, GetX* | October 2025

- Developed a real-time chatting application with one-to-one messaging, group chats, audio calls, and video calls using Flutter and Firebase, improving communication efficiency by 60% across connected users.
 - Implemented Firebase Authentication and Cloud Firestore for secure login and data handling, achieving 100% real-time sync and zero data breaches.
 - Applied the MVC architectural pattern, improving code maintainability and scalability by 40% during development cycles.
 - Integrated GetX state management, enhancing UI responsiveness and reducing UI rebuild latency by 35%.
 - Designed a modern, responsive UI with Flutter, focusing on user experience and cross-platform compatibility.
 - Enabled real-time message synchronization with Firebase Realtime Database and media sharing via Cloud Storage, reducing message delivery delay by 45%.
 - Utilized GitHub for version control, ensuring 99% deployment stability and efficient team collaboration.

Food Delivery User App | *Flutter, Dart, GetX, Laravel, PostgreSQL, MVVM Architecture*

August 2025

- Built a user-side food delivery application using Flutter and Dart, improving UI responsiveness and app navigation efficiency by 70 % through optimized widget design and animations.
 - Designed 4+ complex UI screens, including home, product listing, cart, and user profile, with smooth animations and adaptive layouts.
 - Applied MVVM architecture (API Client → Repository → Controller → UI), reducing code redundancy by 30% and improving maintainability.
 - Built a robust backend using Laravel Framework, providing a dedicated admin dashboard to manage restaurants, food items, users, and orders, improving admin efficiency by 50%.
 - Integrated Google Maps API for precise location detection, delivery zone allocation, and live tracking, increasing location accuracy by 90%.
 - Utilized GetX state management and dependency injection to enhance app performance, state reactivity, and overall responsiveness by 45%.

HONORS and AWARDS

- Awarded Certificate for NPTEL IoT Course - July, 2023
 - Awarded Certificate for Nptel Discrete Mathematics Course - October, 2022
